

WE MAKE YOUR CHILD FUTURE READY

All-In-One
Success Package with
AI based digital application

www.alohagujarat.com

ALOHA mental arithmetic is a holistic brain development program developing children's brain. This Mental Arithmetic training program transforms and empowers them to perform extensive calculations with stunning speed and accuracy with nothing but their own sharp brain to aid them.

With a curriculum designed to enhance a child's skill set, Aloha endows the child with creativity, concentration, memory, speed writing, lateral thinking, listening capacity, analytical skills and overall self-confidence.

- Research shows that a child's mental growth is most rapid before the age of 14.
- The degree of brain development achieved by a child during this time has a great influence over his/her future.
- A child who has received good brain development by the age of 14 will continue to remain brilliant even up to age of 70.
- Whereas a child who lacks this development can experience a sharp decline in brain abilities even as early as 20.

Try solving
 $123+456+13-48+534=?$
 $6288-24-13 \times 58217=?$

But A Child Trained at ALOHA
Can Do This In A Jiffy.

An Ideal learning tool for
Little Children
to identify texts & numbers and
handle simple arithmetic calculation

Session per week : 2 Sessions
Duration of each session : 1 Hour
Course Duration : 40 Months

Certification	Duration
Basic	12 Months*
Graduate	12 Months*
Master	12 Months*

ALOHA GUJARAT INTRODUCING

DIGITAL LEARNING SOLUTION
WITH ARTIFICIAL INTELLIGENCE

Learn abacus is a digital learning solution being provided by the ALOHA Gujarat for the convenience of student and parents. The application has been introduced after listening and understanding problems and suggestions of thousands of parents. The application is meant to aid the students to learn and practice precisely at every minute learn abacus application is like a personal teacher for your child at home.

Easy To Learn

Easy To Practise

Easy To Evaluate

WHY LEARN ABACUS APPLICATION?

Abacus course has two parts, learning at centre and practicing at home. If both parts are performed well then only expected brain skills benefits can be achieved.

ALOHA teachers provide the best care and education while the students are at the centre and they ensure that the learning happens in the right and proper manner.

This accounts for 50% of the cycle with the learning happening properly, the other 50% which makes the student master the concepts, is the practice which majorly happens at home. This is the place where the need for supervision was felt to be the highest.

Even after the best efforts of all the stakeholders it has been observed that children at home always do not follow the exact processes as taught in the class and since it is practically impossible for teachers to be present in every single house, we decided to launch the Learn Abacus application.

APPLICATION FEATURES FOR STUDENTS

Child Friendly Interface

Personalized Guidance

Customized Homework module

Revision & Best Self-learning Experience

Audio Video Tutorials in multi-language

Unlimited Practise -More than 1 crore sums

Self-Analysis

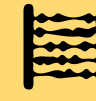

Best Brain Energizer

Personalised Learning With **AI**

APPLICATION FEATURES FOR PARENTS

Perfect abacus education

Application Guide for parents knowledge

Easy Communication with Course Instructor

Value for Money

Detailed reports to know child's strength and weakness

We know that the Learn Abacus application shall be more and beyond the expectations or what we have written down as it has been developed with a lot of thought and love.
